

```
npm i mint-ui -S
```

```
import Vue from 'vue'
```

```
import { Button, Cell } from 'mint-ui'
```

```
import App from './App.vue'
```

```
Vue.component(Button.name, Button)
```

```
Vue.component(Cell.name, Cell)
```

然后, 将 .babelrc 修改为:

```
{
  "presets": [
    ["es2015", { "modules": false }],
  ],
  "plugins": [["component", [
    {
      "libraryName": "mint-ui",
      "style": true
    }
  ]]]
}
```

```
{
  "presets": [
    ["es2015", { "modules": false }],
    ["env", {
      "modules": false,
      "targets": {
        "browsers": [">> 1%", "last 2 versions", "not ie <= 8"]
      }
    }],
    "stage-2"
  ],
  "plugins": [
    "transform-vue-jsx",
    "transform-runtime",
    ["component", [
      {
        "libraryName": "mint-ui",
        "style": true
      }
    ]
  ]
],
  "env": {
```

```
"test": {  
  "presets": ["env", "stage-2", "es2015"],  
  "plugins": ["istanbul"]  
}  
}  
}
```

`npm install babel-preset-es2015`
