

### 标签形式跳转

```
<router-link :to="item.routerName" class="tab_item" v-for="item in items"
:key="item.name">
    <div class="item_pic" :class="item.name"></div>
    <div class="title">{{item.title}}</div>
</router-link>
```

### post 形式带参数跳转

```
this.$router.push({name:'cabinetDetail',params:
{cabinetNumber:cabinetNumber,name:name,address:address}})
```

### 接收POST形式参数

```
this.cabinetNumber = this.$route.params.cabinetNumber;
```

### get形式带参数跳转

```
this.$route.push({path:'/xxx',query:{id:1}}); //类似get传参，通过URL传递参数
this.$route.query.id
```
