

## 父组件这么写

```
<component-a v-on:child-say="listenToMyBoy"></component-a>
<p>Do you like me? {{childWords}}</p>
methods: {
  listenToMyBoy: function (somedata) {
    this.childWords = somedata
  }
}
```

## 子组件component-a这么写

```
<button v-on:click="onClickMe">like!</button>

methods: {
  onClickMe: function() {
    this.$emit('child-say', this.somedata);
  }
}
```
