```javascript
var http = require('http');
var url = require('url');
var fs = require('fs');

var server = http.createServer();
var htmldir = __dirname + '/html/';

server.on('request', function (req, res) {
    var url_str = url.parse(req.url);
    console.log(url_str);
    console.log(url_str.query);
    switch (url_str.pathname){
        case '/':
            // 首页
            console.log('到这了')
            sendData(htmldir+'index.html', req, res);
            break;
        case '/user':
            // 个人中心
            sendData(htmldir+'user.html', req, res);
            break;
        default:
            // 处理其它情况
            sendData(htmldir+'404', req, res);
            break;
    }
});
function sendData(path, req, res) {
    fs.readFile(path, function (err, data) {
        if(err){
            res.writeHead(404, {
                'content-type':'text/html;charset=utf-8'
            });
            res.end('<h1>页面被小提莫吃掉了</h1>');
        }else{
```

```
            res.writeHead(200, {
                'content-type':'text/html;charset=utf-8'
            });
            res.end(data);
        }
    })
}
server.listen(8080,'localhost');
```
