```javascript
function loadScript(src,callback){ // 异步
    let script = document.createElement('script');
    script.src = src;
    script.type = "text/javascript";
    document.body.appendChild(script);
    script.onload = ()=>{callback(src)}
}
function test(name){
    console.log(name)
}
loadScript('/static/1.js',function(script){
    console.log(script);
    loadScript('/static/2.js',function(){
        loadScript('/static/3.js',function(){

        })
    })
})
```
